Canine Genetic Research Participation DNA Samples Needed

The Canine Genetics lab of Dr. Kari Ekenstedt, at Purdue University College of Veterinary Medicine, is heading a research project involving common dog skeletal morphology.

DNA samples from purebred dogs of the following breeds are needed:

BASENJI, BOSTON TERRIER, BULLDOG,
CHOW CHOW, ENGLISH TOY SPANIEL,
FRENCH BULLDOG, ICELANDIC SHEEPDOG, KEESHOND,
NORWEGIAN BUHUND, NORWEGIAN ELKHOUND,
PUG, SHIBA INU

Dogs of any age and health status qualify.

Contact Dr. Dayna Dreger for more information or to submit a DNA sample
